FD400GT Wireless Terminal

Portable Data Terminal for Off-site Credit Card Authorization

- Process transactions from almost any location with full off-site POS mobility.

- Offer greater speed and security with fast, efficient downloads of payment information.

- Simplify the tracking of your payment processing by using one provider.

- Prepare for coming changes in security guidelines that will require the acceptance of EMV (also known as chip-and-PIN) transactions

The FD400GT terminal is a wireless, hand-held point-of-sale device that merchants can easily use remotely to provide customers with the convenience of a full range of payment options. You'll have access to wireless downloads wherever you are. With its touch-screen interface, it is an easy device to train on and use. It enables you to receive the full range of solutions for payment processing, including credit, debit, gift cards, personal paper checks and EBT, all from a single provider. Plus, with the "store-and-forward" capability, you can ensure card-present rates when there is no signal at the time of the transaction.

How

The FD400GT terminal utilizes 3G technologies to connect wirelessly over AT&T®'s GPRS and Sprint™'s CDMA networks, which means you'll be getting the fastest data transmissions and more coverage area for your business. The multi-application platform supports a full range of payment and value-added services. It provides fast, efficient downloads while meeting MasterCard® POS Terminal Security (PTS) requirements.

FD400GT Cost/Operating Fees

The FD400GT costs approximately $900; *however, pricing is subject to change, so please contact us for the latest price; please email Norm Gosselin:* **njg@wordstock.com**.
