

Symbol LS-2208 Programming Barcodes

This documents contains the barcodes that are needed to program a Symbol LS-2208 scanner with LL-500 Omnilink.

LS-2208 Programming Overview

Before the LS-2208 scanner will work with your Omnilink LL-500 decoder, some programming is required. To do so, scan the four barcodes that follow:

Barcode #1: Set all defaults

Barcode #2: Undecode Scanner Emulation Host

Barcode #3: 50 μ s Module Width

Barcode #4: Autodiscriminate UPC/EAN Supplement

IMPORTANT NOTE for GIFT CARD or LOYALTY CARD Scanning!

If Gift Card/Loyalty Card scanning capability is being added for the first time,

OR

if Gift Card/Loyalty Card scanning capability has been in place and you have been instructed by Wordstock Support to re-scan the complete set of Gift Card/Loyalty Card programming barcodes, you **MUST** scan these three LS-2208 programming barcodes for a second time **BEFORE** continuing on to the Gift Card/Loyalty Card barcodes.
